## **DETAILED ACTION**

### ***Election/Restrictions***

1. The application contains a plurality of discloses patentably distinct species comprising:

(1) the specifics of the optical element being comprised of liquid crystal layer that is patterned such that the outer peripheral region is removed and where the protective layer is formed to cover the upper surface as well as the side surface of the liquid crystal layer comprising a first embodiment corresponding to Figures 1-3B and 9;

(2) the specifics of the optical element being comprised of liquid crystal layer that is patterned such that a plurality of colored regions correspond to display regions and where the protective layer is formed to cover the upper surface as well as to fill the spaces between the colored regions and the liquid crystal layer comprising a third embodiment corresponding to Figure 4;

(3) the specifics of the optical element being comprised of an alignment film and a transparent electrode comprising a first embodiment corresponding to Figure 5;

(4) the specifics of the optical element being comprised of a plurality of colored regions correspond to display regions and also a black matrix being formed between each of the colored regions comprising a fourth embodiment corresponding to Figures 6A and 6B;

(5) the specifics of the optical element being comprised of a plurality of colored regions correspond to display regions and also a black matrix being formed apart from

the colored regions and formed on the support substrate of the alignment substrate comprising a fifth embodiment corresponding to Figures 7A and 7B;

(6) the specifics of the optical element being comprised of a plurality of colored regions correspond to display regions and disposed under the liquid crystal layer and in contact with the alignment substrate and also a black matrix being formed between each of the colored regions comprising a sixth embodiment corresponding to Figures 8A and 8B.

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2871

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
